Computer Science

Language & Tools

- iOS Development
- Swift
- Java
- Xcode
- Object Oriented Programming
- Github
- Firebase
- Adobe Photoshop
- App Store Publishing
- JSON/XML

Development Projects

NeON Student Mobile App on iOS APP STORE
Developed mobile app for my university which displays all student information and records of overall semester. Used a open-source API which my university provided. Parsed JSON and saved into database locally on user device with CoreData for offline usage.
Downloaded 300+ on iPhones and 5 Star Reviews.

iOS Social Media App on GITHUB
Developed a Database project of our semester, Social Media App similar to Facebook. Created Upload Post and Like Post Functionality with Firebase as a Backend.
Used Firebase Authentication to authenticate user securely. Used Firebase Database to save all content and Firebase Storage to store user profile and post images.

Shopping Cart with QT C++ and SQLite
Developed a Computer Programming project of our semester. Created a Shopping management system with QT C++ and SQLite.
